**Drug use disorder** substance or drug abuse and addiction, drug use disorder, also called substance use or chemical use disorder, is an illness characterized by a destructive pattern of using a substance that leads to significant problems or distress, including tolerance to or withdrawal from the substance, as well as other problems that use of the substance can cause for the sufferer, either socially or in terms of their work or school performance. The effects of drug use disorders on society are substantial.

**Journal of Drug Abuse** expresses sincere gratitude to all its elite panel of editorial board members for their continuous efforts, valuable support and encouragement throughout the publication journey of the journal, right from its inception in the year 2015 and congratulates them for making the journal publish quality of research and becoming as one of the leading and well-recognized broadcaster of scientific outcomes in the field of studies related to findings developments from strengthening policies and systems for mental.

Journal of Drug Abuse is aim to publish foster activities in the field of drug abuse and the burden associated with mental, neurological and substance use disorders, and to promote mental health worldwide.

The **objective** of **IPJDA** is to publish high-quality original research papers, case studies, narratives, review article, short communication, clinical data, epidemiologic studies, thesis and relevant and insightful reviews. Every year we published with different volumes and different issues. Each issue of the journal covered with different types of topics in the field of mental health, neurological and substance abuse problems and service systems; evidence-based technical guidance on mental health and substance abuse; strengthening policies and systems for mental, neurological and substance abuse care; strengthening capacity on mental health and substance abuse policies and systems to deliver services that are effective, adequate and respect the human rights of affected individuals, and respond to emerging mental health problems such as emergencies and HIV/AIDS. All published papers, are subject to the journal's double-blind review process. The current volume of the journal is 6 with issue 1.

Drug abuse Journal has one of the fastest turnaround times of any medical journal in the world. Generally peer review is complete within 2-3 weeks and the editor's decision within 2-7

days of this. It is therefore very rare to have to wait more than 4 weeks for a final decision. The submitted papers will be 21 day rapid review process with international peer-review standards. The Timeline of processing from Submission to Publication is 45 days. Manuscript will be published within 7days of acceptance. The Timeline of processing from Submission to Publication is 45 days. Manuscript will be published within 7days of acceptance.
